

COPEMAR

COPEMAR

Since 1964, we have established ourselves as a family business committed to offer **the best seafood.**

Over the years, we have maintained the traditional values that characterize us, while **we adapted and professionalized** to meet current market demands.

Our priority is to **guarantee the exceptional quality of our products** obtained with the most advanced and efficient techniques, respecting and preserving the environment.

THE TEAM

OUR GREATEST VALUE

It's not just the ships. **The soul of our fleet is our people**, a team of professionals who strive every day to achieve the best catches and process each piece with maximum care.

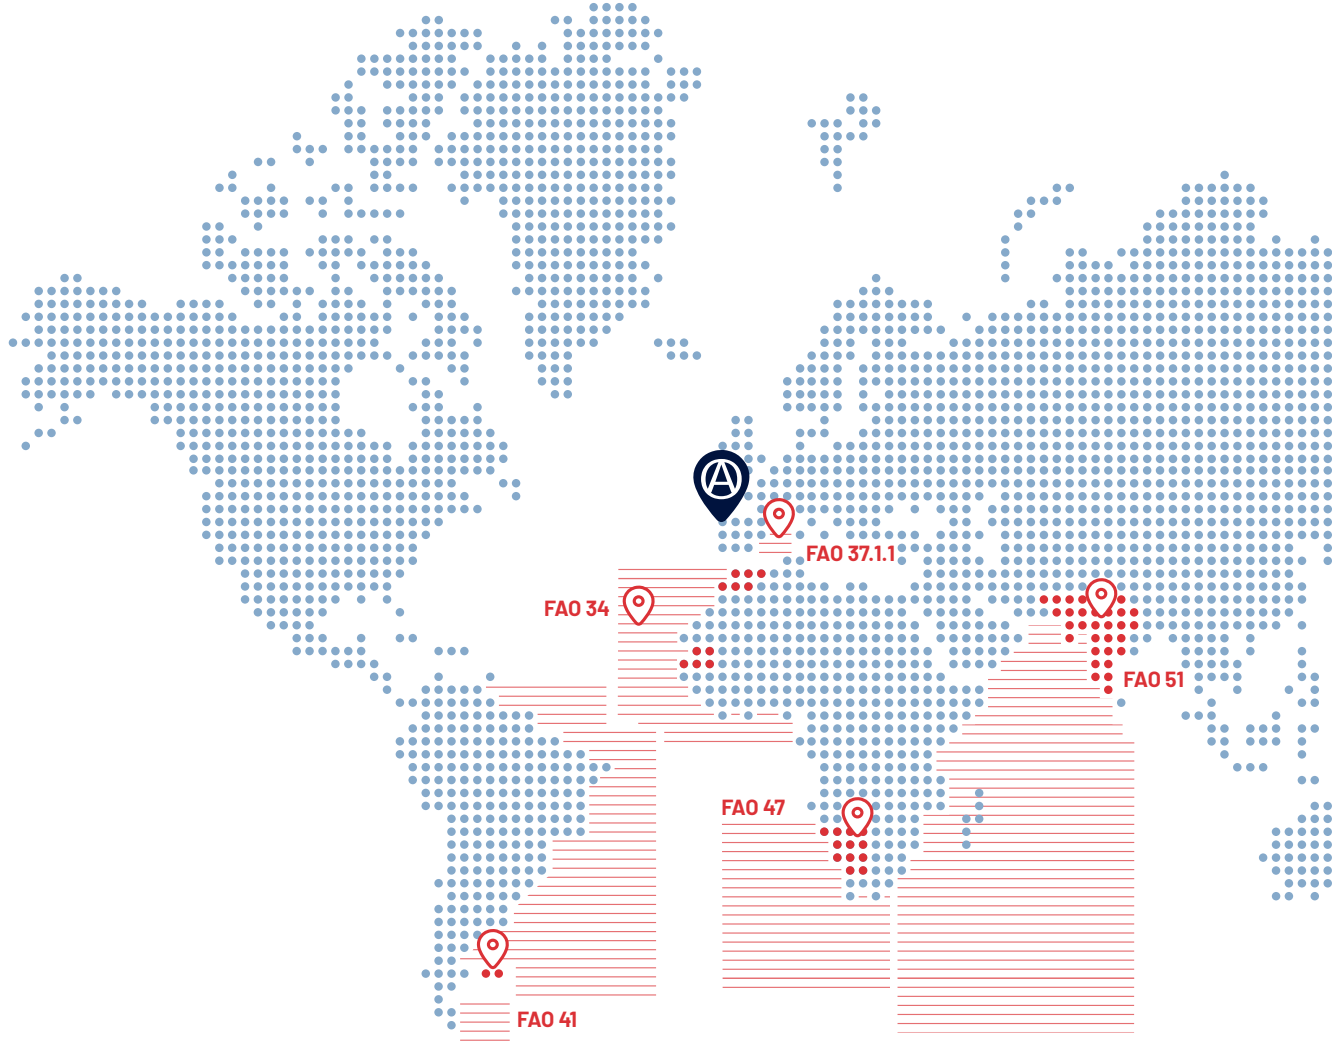

THE RUDDER

A STRATEGIC POSITION

Our head office is located in Vigo; **a city that has one of the most important fishing and logistics ports in Europe;** such emplacement has favored the development of our business and allows us to continue to evolve.

THE ORIGIN

THE BEST FISHING GROUNDS

We get our products from **the most valued fishing grounds**: South Atlantic and Indian Ocean; specifically in several extraordinary places like India, the Falkland Islands, Morocco, Namibia, Senegal and South Africa.

We also have our strategic partner **Beauchêne Fishing** in the Falkland Islands, which allows us access to the highest quality products.

THE QUALITY

CERTIFIED WITH GUARANTEE

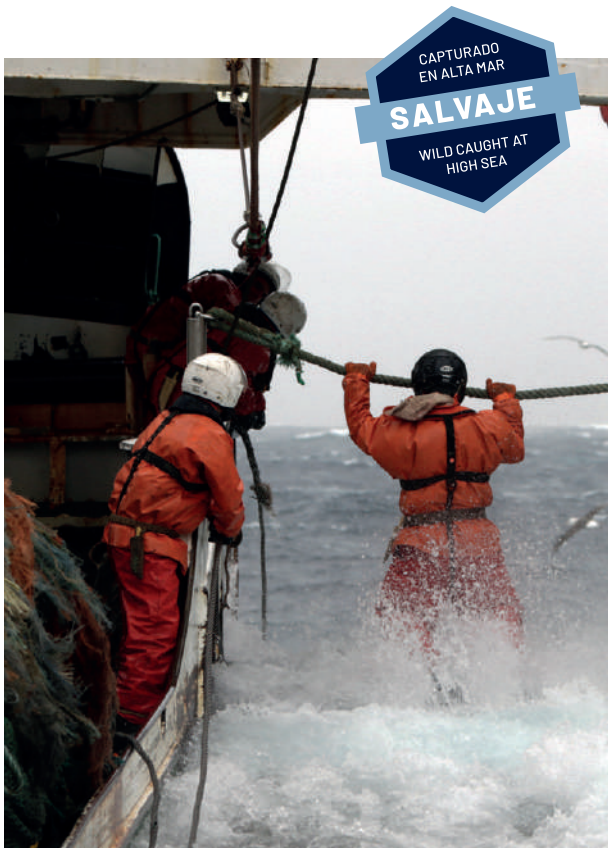

The quality with which we perform each process, together with a strict system of traceability, **is evident in the good service** that we offer to our customers and in the certifications we have obtained.

We currently have the chain of custody certification for the **Cape Hake**. This seal ensures buyers that the product comes from a fishery that is **finely managed and safeguard marine resources**.

This certification is intended to ensure the supervision, evaluation and control of safety protocols and standards that protect **the food safety and healthiness of the products sold**.

THE PROCESS

WE FREEZE ON BOARD

Most of the work takes place on our ship; **from capture to packaging**.

The fish is caught wild on the high seas and frozen on board. This technique **guarantees that all its flavor and quality remain intact** once thawed.

Logistics and
Distribution

VARIETY

WE EXPAND OUR PRODUCTS

Our goal is **to meet the needs and expectations of our clients**. Therefore, in addition to fishes caught through our vessels, **we commercialize also a wide variety of other species** to satisfy all kinds of demands.

These fish are selected for their origin and its qualities, but also, **to meet the strict standards of quality** throughout the value chain, from the origin to the elaboration and commercialization.

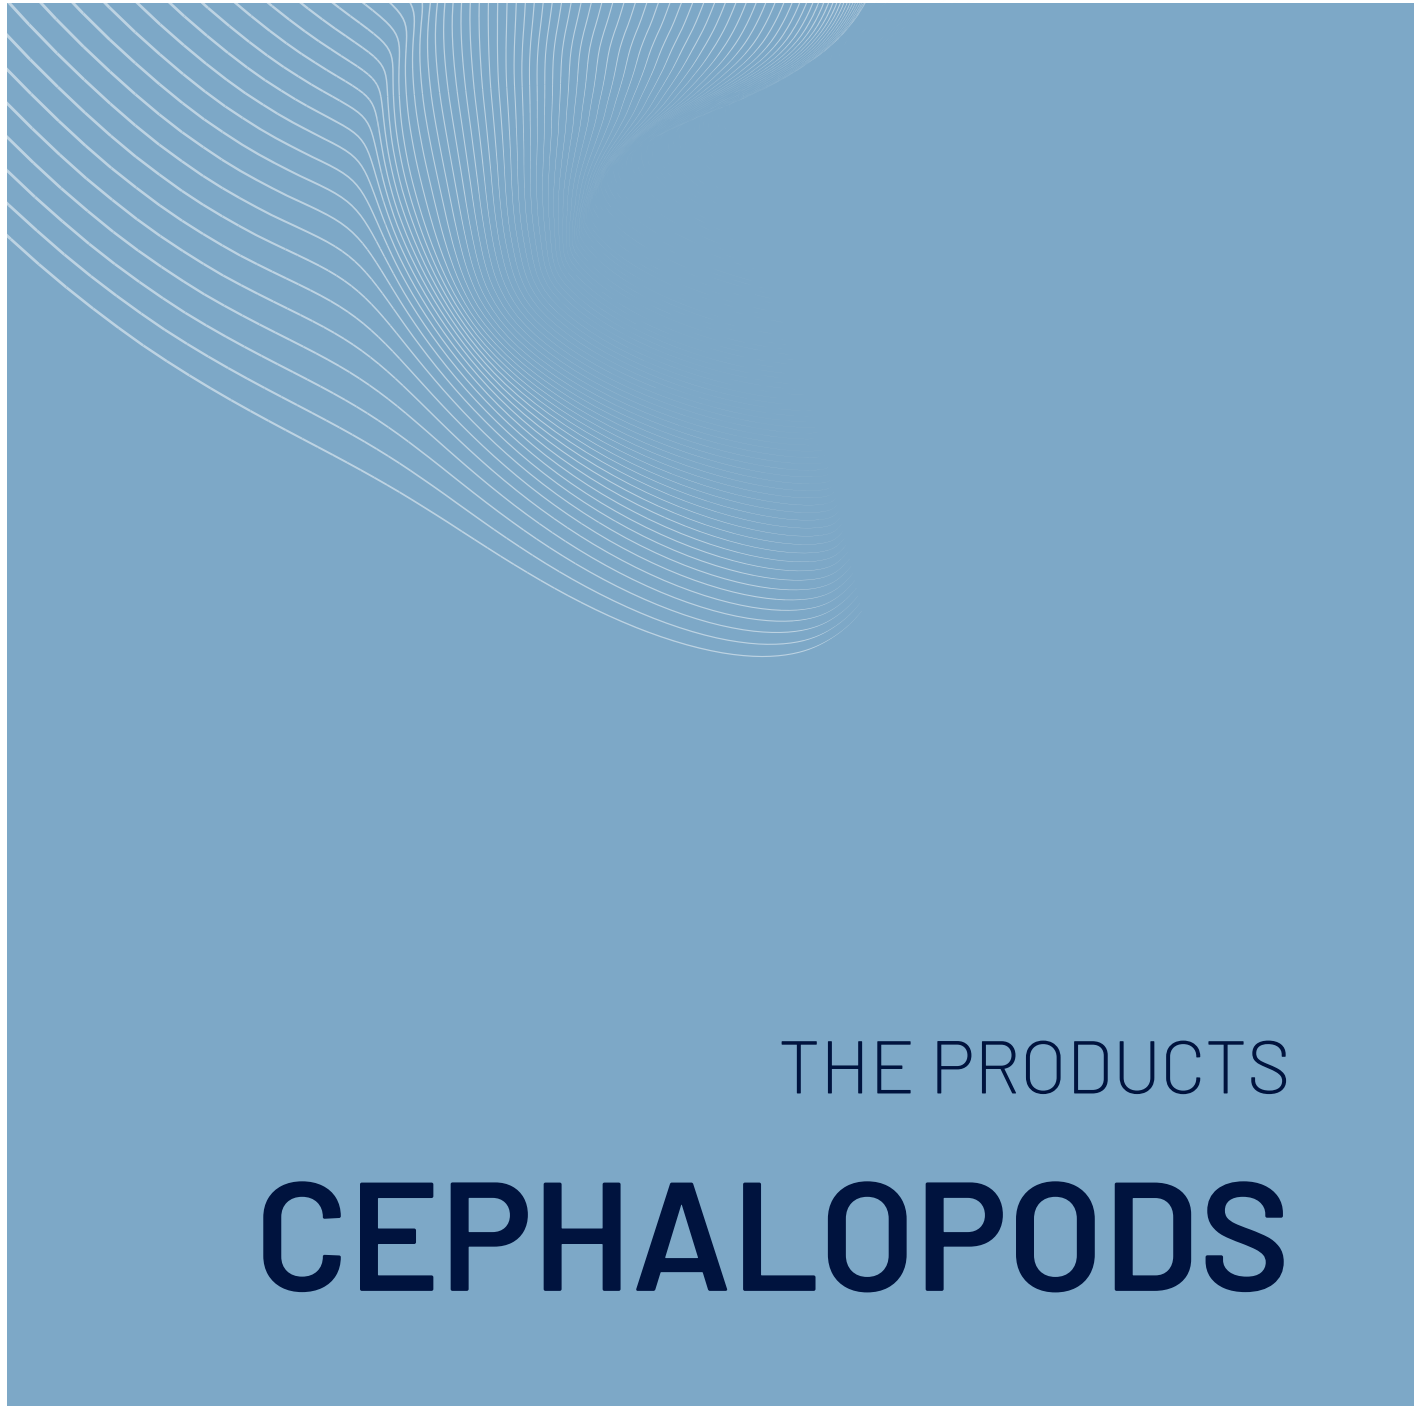

THE ANSWER

WE ADAPT TO THE CHANNEL

At COPEMAR we sell our fish directly to wholesalers and importers, **bringing them closer to the origin and an exceptional quality**.

The guarantee of supply and the formats adapted to the distribution channel, make COPEMAR a very competitive option that **solves all the needs of its customers**.
